Colleen Camp  
Eric Tabak

This evening is in support of Jacob's Cure, founded by Jordana Holovach in 2000 in the hope of saving her son's life. To date, Jordana's tireless efforts have raised millions of dollars for research into Canavan disease. This research has led to innovative medical treatments and gene therapy trials that have made a tremendous difference for children worldwide who suffer from Canavan. Children with Canavan cannot walk or talk, and lose basic functions such as seeing and swallowing. Death usually occurs in the first decade of life.

Please visit [www.jacobscure.org](http://www.jacobscure.org) for further information.

This invite is non-transferable
